

08:30	Workshop opening	
P2P Multimedia applications		
08:45	Jouni Mäenpää, Gonzalo Camarillo	Estimating Operating Conditions in a Peer-to-Peer Session Initiation Protocol Overlay Network
09:10	Konstantin Pussep, Osama Abboud, Thorsten Strufe, Ralf Steinmetz	Adaptive Server Allocation for Peer-assisted Video-on-Demand
09:35	Fabien Mathieu	Heterogeneity in Data-Driven Live Streaming: Blessing or Curse? ☒
10:00	Coffee break	
P2P Optimization I		
10:30	Arijit Ganguly, Oscar Boykin, Renato Figueiredo	Techniques for Low-latency proxy selection in Wide-area P2P networks ☒
10:55	Wei Wu, Jim Womack, Xinhua Ling	Mobile-Friendly Peer-to-Peer Client Routing Using Out-of-Band Signaling
11:20	Tae Woong Choi, Oscar Boykin	Deetoo: Scalable Unstructured Search Built on a Structured Overlay
11:45	Surendar Chandra, William F. Acosta	Using query transformation to improve Gnutella search performance
12:10	Keqin Li	Analysis of Random Time-Based Switching for File Sharing in Peer-to-Peer Networks
12:35	Lunch	
Invited Talk		
13:35	Serge Chaumette	Challenges and results in secured fleets of P2P mobile and autonomous communicating systems
P2P Optimization II		
14:10	Luca M Aiello, Marco Milanesio, Giancarlo Ruffo, Rossano Schifanella	Tagging with DHARMA
14:35	Pierre Fraigniaud, Hoang-Anh Phan	Degree Hunter: on the Impact of Balancing Node Degrees in de Bruijn-Based Overlay Networks
15:00	Salvatore Spoto, Rossano Gaeta, Marco Grangetto, Matteo Sereno	BitTorrent, fountain codes: friends or foes?
15:25	Coffee break	
P2P applications & security		
15:55	Lucia D'Acunto, Michel Meulpolder, Rameez Rahman, Johan A. Pouwelse, Henk J. Sips	Modeling, Analyzing the Effects of Firewalls, NATs in P2P Swarming Systems ☒
16:20	Thibault Cholez, Isabelle Chrisment, Olivier Festor	Efficient DHT attack mitigation through peers'ID distribution
17:10	The Tung Nguyen, Didier El Baz, Pierre Spitéri, Guillaume Jourjon, Ming Chau	High Performance Peer-to-Peer Distributed Computing with Application to Obstacle Problem
17:35	Workshop closing
